Art Unit: 2424

DETAILED ACTION

Response to Amendment

- 1. This office action is in response to communications filed 05/19/2010. Claims 1 and 7 are amended. Claims 2-6 have been previously presented. Claim 8 has been cancelled.
- 2. Note Claim 7 is marked with "previously presented." The examiner assumes "currently amended."

Response to Arguments

3. Applicant's arguments filed 09/14/2010 have been fully considered but they are not persuasive.

Regarding Claim 7, the applicant argues that Slezak does not anticipate each and every element of the claim (Page 7). The applicant recites the rejection on page 8. The applicant argues that while the limitations disclosed by Slezak may disclose limitation of the claims and the end goal result may be the same but the applicant's invention is different from Slezak (Page 8-9). The applicant argues that the in particular Slezak does not disclose "selecting means....at a particular user's location, upon receipt of the information signal, the selecting means under control of the operates on the input broadcast signal to generate an output broadcast signal..." (Page 9).

Application/Control Number: 10/084,722

Art Unit: 2424

In response to the arguments, the examiner respectfully disagrees. Slezak discloses the limitations as provided in the rejection and as stated by the attorney on Page 8. The elements recited in the claims are met by Slezak. Slezak discloses the control information including location information of the at least one particular event (Column 4, lines 15-20).

Page 3

Slezak discloses offering a plurality of subscription and user making a choice and if the chosen subscription selectively includes an event or not; if the user is paying for the program at full cost, then advertising is not included (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4). Slezak discloses generating an information signal which has control information consisting essentially of control information and an input broadcast program (Column 8, lines 18-39, Column 9, lines 6-10, Column 3, lines 63-67, Column 4, lines 1-4). The choice of a subscription depends on the choice of whether a user wants to view a free, less expensive or more expensive programming. The subscription defines whether a program will include a particular event (or advertisement) or not. The selection means output a program with particular event or not based on the subscription selected by the selection means (Column 8, lines 18-39, Column 9, 6-10). Slezak disclose a plurality of subscribers but does not specifically disclose each of a plurality of viewers are receiving the information signal. See rejection.

4. Regarding Claim 3, the applicant repeats arguments. The applicant argues that there is no description as to how Akamatsu can operate with Slezak to perform the limitations ("said device is configured to perform the acts of accelerated reading of a

Art Unit: 2424

recorded program" (Page 9). The applicant further argues that Akamatsu does not supply what is missing in Slezak (Page 9).

In response to arguments, the examiner respectfully disagrees. Slezak discloses allowing accelerating of a program and not allowing or deactivating the accelerating based on the subscription (Column 9, lines 22-24, 53-60). Slezak does not explicitly disclose that the pay program can be recorded. Akamatsu allows a user to record a pay program (Column 7, lines 16-19). Slezak discloses a user system with a set top box or receiver (Figure 1, 504). Akamatsu discloses a system with a receiver and recorder (Figure 1, 100, 120). The purpose to allow a user to record pay programs instead of in the past when users illegally recorded the programs so that users are no longer inconvenienced to watch a pay program at time it is broadcasted (Column 14, lines 13-30, Column 2, lines 8-22). See response above.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 6. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 2424

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The applicant amends the claim limitations to include "said control information including location information of the at least one particular event in said input broadcast program." There is no support for this limitation in the specification. The applicant makes an argument that at the user's location, under the control of control information operating on a broadcast signal to generate an output broadcast signal which may or may not include the particular event depending upon the chose subscription. The argument which the examiner interprets that the applicant is stating that is inherent that at each user's location, control information selects a particular event to be output. However, even if it were to be inherent, the applicant's limitations states that the control information includes location information of the at least one particular event. There is no location information of particular events.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Slezak (US 6,006,257).

Regarding Claim 7, Slezak discloses a device for presenting an output broadcast program in accordance with a subscription chosen by a user (Figure 1, 504, Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), the device comprising:

means for receiving an information signal or the receiver (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7, Column 9, lines 6-10) receiving an information signal consisting essentially of control information including a message and signals allowing users to choose between subscriptions and movies and information allowing a user to forward shift a video or not forward shift a video based on the subscription (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Column 9, lines 6-10, 39-55, Figure 7) and an input broadcast program having at least one particular event or an advertisement (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7); the control information including location information of the at least one particular event (Column 4, lines 15-20); and

Means for selecting portions of the input broadcast program in dependence on the control information to form the output broadcast program, the selection means configurable by a provider of the information signal to be responsive to the control information on the basis of the subscription chosen by the user (Column 9, lines 20-23, Column 8, lines 18-39, remote control unit, keyboard, mouse, Column 3, lines 63-67, Column 4, lines 1-4, Figure 1, 504, Figure 7) for at least one of various durations as there is a pay level without commercials (the program only), discounted pay level (some commercials with the program) and a free level (more commercials with the program) (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7),

Application/Control Number: 10/084,722

Art Unit: 2424

Column 9, lines 38-56).

Wherein the selecting means (Column 8, lines 18-39, remote control unit, keyboard, mouse) operates on the input broadcast program having at least one particular event to selectively provide the output broadcast program (Column 8, lines 18-39, remote control unit, keyboard, mouse, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7), the particular event being included or not included in the output broadcast program according to the subscription chosen by the user in accordance with the control information based on the control information or information that determines which subscription the user will select and may or may not include the particular event or advertisement (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 1, 5042) in dependence on the configuring of the selecting means by the provider according to the subscription chose by the user (Column 8, lines 18-39,

Page 7

Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slezak in view of Eyer et al (US 6,588,015 and hereafter referred to as "Eyer").

comprising:

Regarding Claim 1, Slezak discloses a method using a telecommunication system (Figure 1) to enable a service provider (Figure 1, 510, 520) to differentiate among a plurality of subscriptions originated by a plurality of users to a service in respect of processing one or more input broadcast programs (Column 3, lines 63-67, Column 4, lines 1-4), each input broadcast program comprising at least one particular event (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), the method

Page 8

Offering the plurality of subscriptions having various subscriptions durations to each of a plurality of users as there is a pay level without commercials (the program only), discounted pay level (some commercials with the program) and a free level (more commercials with the program) (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Column 5, lines 11-26);

a user making a choice of subscription using a device comprising means for effecting the choice, the device further comprising means for selecting (Figure 1, 504, Column 8, lines 18-39, remote control unit, keyboard, mouse, Column 3, lines 63-67, Column 4, lines 1-4); and

Validating the user's choice of subscription and configuring the means for selecting to be responsive to the control information in dependence on the subscription choice (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4);

Generating an information signal (Column 8, lines 18-39, Column 9, lines 6-10, 39-55) consisting essentially of control information (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Column 9, lines 6-10, 39-55) and an input broadcast

program comprising at least one particular event (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), the control information including location information of the at least one particular event in the input broadcast program (Column 4, lines 14-20);

Transmitting the information signal to the user making the selection (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7);

At the user's location, operating the input broadcast program comprising at least one particular event the means for selecting (Column 8, lines 18-39, remote control unit, keyboard, mouse) in dependence on the control information to selectively provide an output broadcast program or the input program relies on the program including the advertisement (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), the particular event being included or not included in the output broadcast program in accordance with the control information or based on the control information or information that determines which subscription the user will select and may or may not include the particular event or advertisement in dependence on the configuring of the mans for selecting according to the chosen subscription (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4).

Slezak is silent on each user making a choice of subscription, transmitting the information signal to each of the plurality of users and at each user's location operating means to output the program in dependence with means for selecting according to the chosen subscription.

Art Unit: 2424

Eyer discloses a provider differentiating among a plurality of subscriptions originated by a plurality of users to service in respect of processing of one or more input broadcast programs, each input broadcast program comprising at least a particular event (Column 4, lines 11-17, Column 5, lines 46-56); each user making a choice of subscription (Column 6, lines 56-61, Column 17, lines 13-21 - each paying user of a plurality of paying subscriber or each nonpaying user of a plurality of nonpaying subscribers) and at each user's location, operating the input broadcast program comprising at least one particular event using the means for selecting in dependence on the control information to selectively provide an output broadcast program, in dependence with means for selecting according to the chosen subscription (Column 16, lines 28-60, Column 17, lines 13-21, Columns 18-19, Table 1). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention to modify Slezak to include each paying user of a plurality of paying subscriber or each nonpaying user of a plurality of nonpaying subscribers) and at each user's location, operating the input broadcast program comprising at least one particular event using the means for selecting in dependence on the control information to selectively provide an output broadcast program, in dependence with means for selecting according to the chosen subscription (Column 16, lines 28-60, Column 17, lines 13-21, Columns 18-19, Table 1) as taught by Eyer in order to provide the user with options of service tiers for marketing purposes (Column 2, lines 44-60) as disclosed by Eyer.

Art Unit: 2424

Regarding Claim 2, Slezak and Eyer disclose all the limitations of Claim 1. Slezak discloses that the control information contains a table of events or a database of advertisements (Column 6, lines 15-24, 38-47, Column 8, lines 43-53). It is necessarily included that a database is organized structure of information which can be interpreted to be a table of information. Slezak discloses an act of selecting a particular event on the basis of an event status value in the table or database (Figure 7, Column 9, lines 2-20, Column 8, lines 18-53).

Regarding claim 4, Slezak and Eyer disclose all the limitations of Claim 1. Neel discloses the particular event includes at least one advertisement (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4),).

Regarding claim 5, Slezak and Eyer disclose all the limitations of Claim 1. Neel discloses the act of the user making the choice of the subscription comprises an act of selecting one subscription from among several subscriptions including different programs and a pay level and free level for the different programs offered on a graphics interface in communication with the device (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), 4).

Regarding claim 6, Slezak and Eyer disclose all the limitations of Claim 1.

Slezak discloses the validating step is implemented by the service provider by sending the device a signal characteristic of the chosen subscription (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4), the signal being suitable for configuring the means for selecting as a function of the chosen subscription as the service provider sends either the paid version of the program, discount version or the free version with

Art Unit: 2424

the particular event (Column 8, lines 18-39, Column 3, lines 63-67, Column 4, lines 1-4, Figure 7).

11. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Slezak in view of Eyer, as applied to claim 1, further in view of Akamatsu et al (US 7,257,132 and hereafter referred to as "Akamatsu").

Regarding Claim 3, Slezak and Eyer disclose all the limitations of Claim 1. Slezak discloses the device comprises means for accelerated reading of the program (Column 9, lines 22-24); and means for deactivation for deactivating the accelerated reading means (fast-forwarding) of the program during the particular event in respect of a specified subscription in accordance with control information or control data defining the subscription as a one which a viewer must view the advertisement to get a free or reduced cost programming and a forward shift is not allowed until the must view event is viewed. (Column 9, lines 53-60). The combination does not explicitly disclose that a pay program can be recorded therefore, recording the program. In analogous art, Akamatsu disclose a pay program can be recorded therefore, recording the program (Column 7, lines 16-19). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the to include a pay program can be recorded therefore, recording the program (Column 7, lines 16-19) as taught by Akamatsu in order to allow a user to record pay programs without illegally recording pay programs (Column 14, lines 13-30) as taught by Akamatsu.

Art Unit: 2424

Conclusion

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to FARZANA HOSSAIN whose telephone number is (571)272-5943. The examiner can normally be reached on Mondays and Wednesdays, 8:00 am to 1:00 pm, Tuesdays, Thursdays and Friday 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Kelley can be reached on 571-272-7331. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
